

## PRODUCT

**LITE ULTRA STOVE SYSTEM 0.8L**

## BRAND

**PRIMUS**

**STAND 226**

Lite Ultra Stove System is our lightest stove system – designed for weight-conscious hikers and climbers who want to move fast and pack light. We've reduced every gram without compromising function. With titanium handles, lightweight burner and pot, and a minimalist design, this is cooking gear at its lightest. It's fuel-efficient, stable and wind-resistant, even in alpine or exposed conditions. Weighing just 240g (burner + pot), this weight-optimized stove system stands unrivalled.

## PRODUCT

## THE ULTIMATE SKI ESSENTIALS PERFORMANCE PACK

## BRAND

## SWISS MOUNTAIN RESCUE

## STAND 344

Swiss Mountain Rescue is redefining safety and performance on the mountain. With over three-quarters of ski accidents linked to fatigue, our Performance packs addresses the issue: sore muscles, low energy, and poor recovery. Each product is tested at altitude and engineered to keep skiers feeling stronger for longer. Our potent, natural formulations meet a clear and growing demand and our performance packs bring genuine functional innovation to a category that has been overlooked for too long.

## ANNA JACKET

## BRAND

## NOBODY'S PRINCESS

## STAND 100

Unlike anything else on-market, Nobody's Princess' Anna Snow Jacket is a women's technical and feature-packed jacket that provides the ability to adjust both the bust and the hips width with our smart and discreet gusset system. This 20K/20K waterproof and breathable jacket allows women to perfectly adjust and fit in the areas they need most. Innovative design through the jacket seams allows for minimal restriction through the shoulders, arms, and back. Better fit ensures comfort, confidence, and performance on the snow for all women.

**PRODUCT**  
**AXIOM SHELL**  
**BRAND**  
**INSELBERG**  
**STAND 238**

The Axiom Shell was designed to solve a core problem with alpine shells. Porous membranes like ePE lose performance as oils, sweat, and dirt build up inside the membrane structure. Developed in collaboration with Toray Japan, our four-layer fabric uses a durable 140D nylon face laminated to a dual porous membrane and non-porous Dermizax membrane protected by a tricot liner. By keeping the non-porous membrane next to the body, contamination is prevented and breathability stays consistent throughout demanding alpine use and the life of the shell.

**PRODUCT**  
**THERMAL POWER HOODIE**  
**BRAND**  
**VERTURA**  
**STAND 68**

Designed with women in mind, by focussing on fit and the features that matter for active use in the mountains. Lycra bound hand warmer pockets mean no zips to dig in or chafe under a pack or harness, while still providing quick and easy storage. Essential items like a phone, card or keys can be stored in the amply sized but low profile zipped chest pocket that can still be accessed when wearing layers over the top. Made in Portugal from Portuguese fabric, reducing the carbon footprint of manufacture and transportation to the UK.

## PRODUCT

**PHANTOM GLIDE**

## BRAND

**PHANTOM GLIDE**

**STAND 176**

**Phantom Glide is a permanent, more eco-friendly base treatment for skis and snowboards that provides consistently fast glide without the hassle of waxing. Unlike traditional wax, it chemically bonds to the base and never wears off, eliminating the need for regular reapplication. Free from PFAS and fluorocarbons, it's safe for both the user and the environment. If you've ever fought to keep momentum on flats or felt held back by slow glide, Phantom delivers smooth, lasting performance every time.**

## PRODUCT

**PISTEWORCS 89**

## BRAND

**DPS**

**STAND 176**

The Pisteworks 89 has one mission: deliver GS-level power and precision on hardpack in one turn, then switch to loose, floaty handling the next. Co-developed with Ted Ligety and engineers at a top carbon facility, it blends race grip with freeride versatility and a Carbon Power Plate recycles high-end carbon waste while improving damping, response and edge control, while lowering materials impact. Its shaping enables deep, stable carves yet adapts to creative lines in mixed snow, giving skiers control and retailers real performance credibility.

**PRODUCT**  
**SURVIVAL SHELTER 1**  
**BRAND**  
**LIFESYSTEMS**  
**STAND 112**

The 1 Person Survival Shelter offers proven emergency protection in harsh winter conditions. Its tough, waterproof construction with taped seams and an integrated seat panel shields users from wind, rain and cold, helping retain vital body heat when exposure becomes dangerous. High visibility fabric and reflective details improve rescue visibility in low light. Compact, durable and quick to deploy, it delivers dependable performance for solo adventurers when conditions deteriorate.
